

EasyV-Suite

YESpay is a growing global organisation providing “Managed Card Payment Processing Services”. We uniquely offer secure Internet based EMV Chip & PIN payment services to multi chain retailers operating in high street, hospitality, leisure, mail order and e-commerce environments.

We are certified to “Europay MasterCard and Visa” (EMV), Verified by Visa (V-by-V), MasterCard SecureCode and Payment Card Industry Data Security Standards (PCI-DSS). We help migration to EMV Chip & PIN and Contactless payment standards, as well as 3D Secure (V-by-V and SecureCode) web payment standards thus eliminating payment card fraud within your retail environments.

Our EMBOSS payment processing back-office platform is certified and accredited by major bank card Acquirers in Europe and North America. We operate a SaaS (Software as a Service) business model for providing card payment services globally.

EasyV-Suite of card payment products:

EasyV-Retail - PC EPOS based EMV Chip & PIN Payment Application for Retail High Street, Leisure, Ticketing, Transport and Mail order & Telephone order.

- Proven, highly available and resilient multi-function payment solution
- High-speed transaction authorisation and settlement
- Pre-accredited with multiple Card Acquirers
- Value added applications - Gift card and mobile E-top-up
- Real-time web based administration and transaction reporting
- PCI-DSS Level 1 approved payment service

EMBOSS is our **Gateway to Managed Payment Services** which provides merchants with card acquirer pre-approved payment services that integrate to their in-store EPOS, self service Kiosk, Hospitality, Mobile POS and Internet environments. EMBOSS has been pre-accredited (generically) by major European and North American card acquirers. In addition, with new requirements for card and transaction security, EMBOSS is fully certified to Payment Card Industry Data Security Standards (PCI-DSS Level 1) as mandated by Visa and MasterCard.

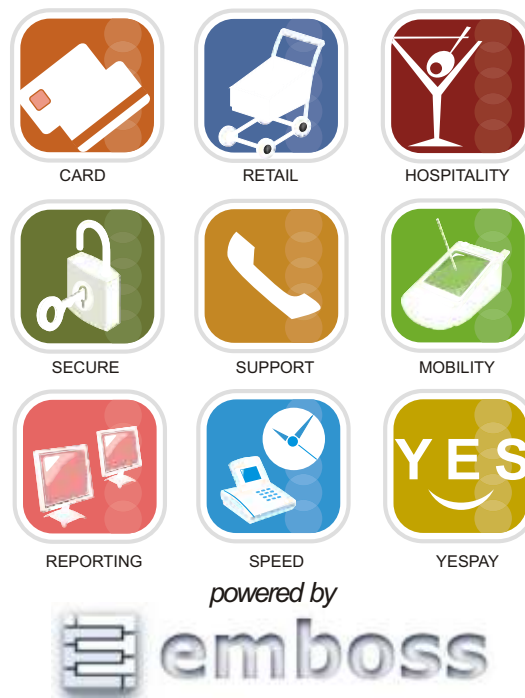

EasyV-Suite EFT Card Payment Clients link via WiFi/LAN and ADSL/3G/GPRS routers to the EMBOSS gateway enabling end-to-end transaction authorisations to card acquirers (within ~3-5 seconds), receipt printing via available printers and transaction settlement overnight or in real-time.

Real-time web reports ensure merchants can access up to the minute card transaction reports for all their EasyV-Suite clients. Downloadable card transaction reports can be imported into in-house accounts and management reporting applications in a matter of minutes making transaction reconciliation simple.

“Out-of-the-box” EasyV-Suite EFT Clients

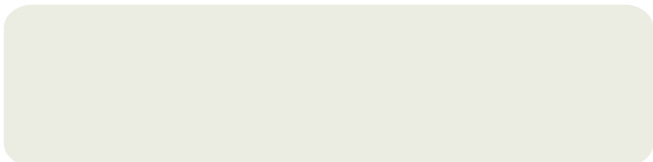

EasyV-Suite is a most cost-effective card payment solutions for EPOS, Kiosk, Hospitality, Mobile POS and Internet Websites that combines with the back-office hosted EMBOSS payment service to enable any merchant to perform credit or debit card payments.

Not limited to the confines of their stores, merchants can now extend their sales channels to accept card payments from any point of sale system within their retail infrastructure. Merchants receive an “out-of-the-box” EMV Chip & PIN and contactless payment solution ready to use with minimal configuration.
