

# EasyV-Hospitality

EMV Chip & PIN Card Payments for  
Hospitality services

EasyV-Hospitality is the most comprehensive pre-accredited portable card payment solution, with full support for split bills, gratuity and pre-authorisation functions, for pay-at-table EMV Chip and PIN payments within restaurants, bars and clubs.

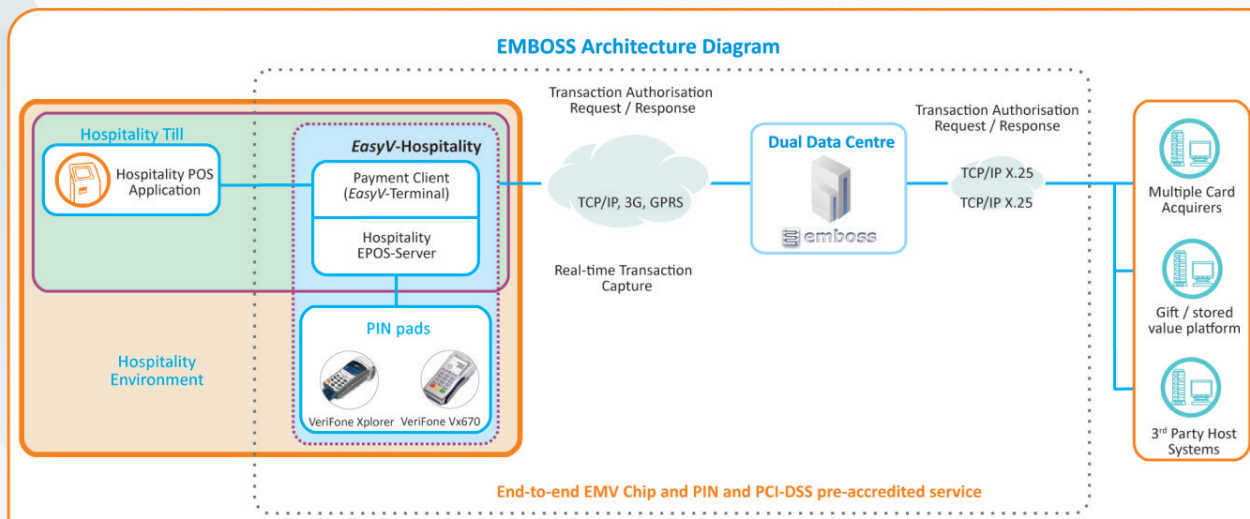

Used in either standalone or integrated-with-EPOS mode where multiple tills can use one or more portable device, EasyV-Hospitality combines powerful payment software with the Verifone VX range of WiFi terminals in one convenient solution. Using simple menu options, restaurant and bar staff can accept any card payment securely authorised and settled with their Card Acquirer via YESpay's EMBOSS payment service.

With a low monthly processing fee, EasyV-Hospitality is the ideal payment service for all your hospitality payment needs.

## Key Merchant benefits

- Multi-acquirer pre-accredited enabling Merchants to fast track their deployment of pay-at-table payment services
- PA-DSS and PCI-DSS Level 1 certified helping Merchants reduce the scope & costs of on-going compliance
- Supports full sale with split bill, gratuity and pre-authorisation transactions
- Operates in standalone or integrated-with-EPOS environments
- High-speed transaction authorisation and real-time or batch settlement
- Monthly service fees lower than bank rented payment terminals
- Extended help desk and support service

### Multi-acquirer pre-accredited

*EasyV-Hospitality*, linked to EMBOSS, has been end-to-end generically pre-accredited by leading European Card Acquirers. Merchants can quickly deploy their integrated hospitality card payment solutions within a matter of weeks without the need to conduct any additional formal bank testing.

### PA-DSS & PCI-DSS approved

*EasyV-Hospitality* is PA-DSS and PCI-DSS Level 1 certified. Merchants can significantly reduce timescales, initial and on-going annual costs, sometimes up to 65%, to become fully PCI compliant since *EasyV-Hospitality* does not provide access to credit and debit card data.

### High-speed authorisation & settlement

Using IP connectivity, end-to-end authorisation requests are performed in less than 3-5 seconds. Using stand-in floor limits, *EasyV-Hospitality* is capable of performing off-line transaction authorisation in case of IP connectivity failure. Any transaction value below the floor limit will be locally authorised whilst those above require manual authorisation (referral), thereby ensuring the merchant can continue to accept credit and debit card transactions and keep their business operational.

All transactions conducted via EMBOSS are batch settled overnight automatically to the Merchants card acquirer.

### Multi-PIN Pad support

*EasyV-Hospitality* has been accredited with a variety of PIN Pad devices (VeriFone VX670 wifi & Xplorer Bluetooth). Each device is fully EMV Level 1 & 2, Visa PED, PCI PED and APACS Common Criteria approved.

### Card & transaction type support

All major EMV credit and debit cards (Visa, MasterCard, Maestro, Amex, Diners, JCB, Discover and more) are supported. All transactions types from sale, refund, split bill and gratuity are fully can be conducted via *EasyV-Hospitality*.

### Real time reporting

Merchants can securely access real time transaction reports via the web through their EMBOSS account making reconciliation fast and simple. Downloadable transaction and settlement reports, all the way to a single terminal can be imported into in-house accounts and management reporting applications in a matter of minutes.

### Cost saving

Delivered as a SaaS service (Software as a Service), Merchants benefit from low on-going monthly fees per hospitality terminal. A one off setup fee per POS terminal ensures they are fully linked and tested with EMBOSS and the Merchant's card acquirer within days.

### Integration made easy

*EasyV-Hospitality* is simple to integrate into existing EPOS hospitality point-of-sale software. Using a standard software interface called *EasyV-Terminal* and the Hospitality EPOS-server module that manages the queuing of card transactions, YESpay's hospitality partners can upgrade their point-of-sale applications with integrated credit and debit card payments in a matter of days.

Following half a day of validation testing with YESpay, merchants can deploy their hospitality systems immediately without further EMV bank or PCI-DSS testing. Following a simple registration process, Merchants can deploy their standalone or integrated hospitality systems within days.

### Service resilience & support

EMBOSS dual data centres, based on the latest cloud computing architecture provide 24x7 operation with 99.9% availability of payment service. Help desk services are available Mon-Sun with extended hours ensuring Merchants can access support throughout their working day.
