

Internet Payment Service

EXTEND YOUR SALES CHANNELS
ACCEPT SECURE ON-LINE PAYMENTS OVER THE INTERNET

Any e-commerce strategy has to be centred on a powerful and secure on-line payment platform. Enable your retail website with YESpay's EMBOSS Internet payment service to securely authorise and settle high-volume on-line payment transactions with multiple processors and acquirers.

YESpay's EMBOSS bureau service is a trusted and affordable e-payments gateway that enables retailers and portals to securely process Internet payments through their websites helping them to attract and retain customers, and reduce operational costs - no matter what size e-commerce operation they have.

Whether you are a small business wishing to accept e-commerce payments via your website or you are already trading on-line, YESpay provides a fully managed payment processing service to extend your sales channels and help your business to grow.

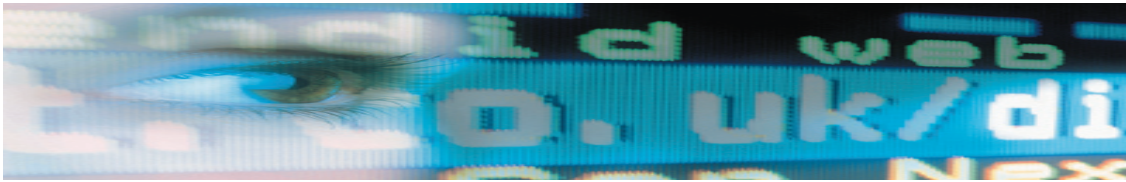

YESpay's EMBOSS bureau service has been independently audited and accredited to the Payment Card Industry (PCI) Data Security Standard — a strict industry-wide security standard mandated by Visa and MasterCard.

• Extend your sales channels.	Enable secure Web payments.
• Support multiple payment options.	Use credit/debit cards, charge cards or pre-paid card accounts to process transactions through links to financial institutions and prepay systems.
• Reduce e-commerce transaction processing costs.	Benefit from a flat monthly fee, no individual transaction charges or annual fee.
• Experience increased security.	Be confident that your customers payment card details are securely handled by EMBOSS. We support AVS (Address Verification Service), CVV (Cardholder Verification) and 3D Secure (VBV - Verified by VISA and MasterCard - Securecode).
• Access real-time transaction reports.	Log onto EMBOSS using a secure username and password to review your on-line transactions conducted via your website to simplify reconciliation.
• Utilise a highly resilient and reliable payment service.	EMBOSS is based on a fully resilient multi-server infrastructure that ensures maximum up time.
• Access help desk.	Our support team is available 7 days a week.
• Start accepting on-line e-payments NOW.	Using our simplified integration process, you can either switch from your payment provider or start to accept on-line e-commerce payments within a matter of days.

YESpay's EMBOSS Internet Payment Service

Your Gateway to real-time, on-line secure payment processing

Integration made Easy

Integrate with YESpay's EMBOSS Internet Payment Service to process high-speed on-line payments and ensure PCI compliancy through your extended sales channel

YESpay's **EMBOSS Internet Solution Partner (ISP)** program is aimed at e-retailers, website developers and portals who wish to integrate on-line e-commerce payments into their web environments.

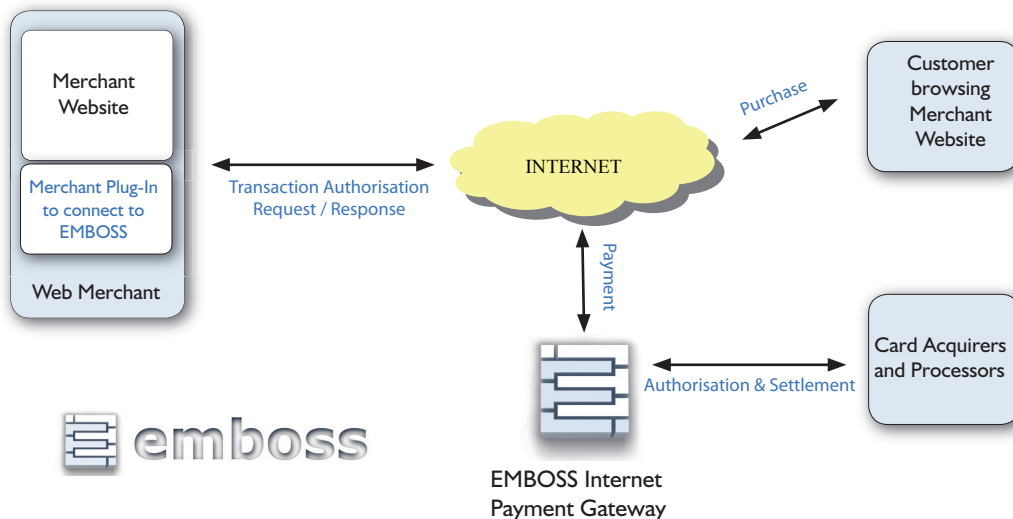

As part of the EMBOSS Internet payment service, YESpay provides a simple to integrate Merchant Plug-In (MPI) used to enable on-line payments via the merchants website. Depending on the developers preference, the MPI can be integrated in two modes

In either mode, you can be confident that your customers payment details are managed securely. Credit and debit card data is protected using the highest levels of encryption and industry standard security protocols supporting AVS, CVV and 3D Secure (Verified by Visa and MasterCard SecureCode) as well as 128-bit Secure Sockets Layer (SSL) security to protect cardholder data being transmitted over the Internet.

REDIRECT mode where the end users are routed to pre-formatted EMBOSS payment pages to capture the cardholder details for routing to card processors for transaction authorisation

Or;

API mode where the end users enter their card payment details on the merchants own payment page and the Merchant Plug-In API sends the data to EMBOSS for routing to card processors for transaction authorisation.
