

# Hospitality Payment Services

powered by  **emboss**

## EMBOSS - PORTABLE & PAY-AT-TABLE CREDIT AND DEBIT CARD PAYMENTS MADE SIMPLE

Chip & PIN payment standards means that in a hospitality environment, a portable wireless PIN Pad with integrated printer becomes a must, along with transaction speed and PIN security as part of pay at table point-of-sale systems. YESpay's EMBOSS bureau is the leading multi-acquirer pre-accredited Chip & PIN and magnetic credit & debit card payment service being used for hospitality – restaurants, bars and pay at table services all benefit from using a handheld terminal to accept card payments with full support of split bills and gratuity. EMBOSS is the only viable alternative to standalone bank owned terminals that is capable of addressing all hospitality integrated EPOS Chip and PIN needs.

Verifone Xplorer

Through the provision of fully hosted and managed EMBOSS payment services, YESpay's partners and customers benefit from minimal capital investment, fast time to market and low monthly service costs. Retailers can simply convert their existing EPOS solution to cater for Chip & PIN at the restaurant table or bar in as little as 2 weeks without the need to change EPOS hardware or software. The solution is simple - YESpay's "EVT-Hospitality" integrates into a networked multi-till environment and caters for support of multiple portable PIN Pads. Using a simple to use and intuitive interface, YESpay's customers can confidently accept any card payment at their portable terminals with the knowledge that each transaction is securely authorised and settled with their card acquirer via EMBOSS.

Detailed transactions reports can be directly accessed in real-time using the web linking to EMBOSS making reconciliation simple. Downloadable transaction and settlement reports all the way to a single EPOS till can be accessed and imported into in-house accounts and management reporting applications in a matter of minutes. YESpay's EMBOSS bureau service has gained multiple generic accreditations with a variety of bank card acquirers. In addition, with the increased requirements of added transaction and card security, EMBOSS has also been fully certified to Payment Card Industry Data Security Standards (PCI DSS) mandated by Visa and MasterCard.

## Addressing all your Retail Chip and PIN needs

YESpay's EMBOSS service features include:

- Fully integrated EFT payment service
- Generically accredited by major Card Acquirers - Barclaycard, Bank of Scotland, HSBC, Lloyds Cardnet
- No requirement for additional bank testing
