

Gateway to Managed Payment Services

YESpos

YESPOS - YOUR TOTAL SOLUTION FOR PC-BASED CARD PAYMENTS REPLACE YOUR TRADITIONAL BANK OWNED TERMINALS

As small and medium sized retailers, call centres and professional businesses such as doctors, dentists and solicitors, you use your PC for many functions including tracking inventory to maintaining customer and employee records and accounting. Now you can use your PC to accept payments as well. YESpos is a complete and easy to use PC application for payment processing.

YESpos - a simple PC payment application

You don't have to be restricted to using slow card payment terminals as the only option to accepting payments. Using any Windows PC, you can install **YESpos** in minutes and benefit from faster transaction speeds, increased efficiency and cost reduction. YESpos is a secure and simple to use payment application that accepts all major credit and debit cards - Visa, MasterCard, Amex, Diners, JCB and more.

YESpos can be used in single sites or multiple locations and utilises your existing high-speed Internet connection. YESpay provides everything you need - from an optional magnetic and chip card PIN Pad to powerful payment software - in one convenient solution that links to our pre-accredited and PCI-DSS approved **EMBOSS Bureau Service**.

In a customer present environment, YESpos connects with the PIN Pad linked to your PC to perform credit and debit card transactions. In a customer not present environment, YESpos uses simple data entry screens to capture cardholder details for mail order and telephone order transactions. In both environments, EMBOSS manages the high-speed routing of on-line authorisation requests and settlement of card transactions on a nightly basis.

A sophisticated management console provides secure access to powerful reporting and transaction search making it easy to reconcile transactions across your entire payment terminal estate. You can rely on YESpos to reduce queues, serve more customers, reduce fraud, and ultimately lead to lower transaction charges; and rely on YESpay for expert professional services and customer support to simplify the implementation process of your PC payment application.

YESpos - the total solution for PC-based card payments

Powered by

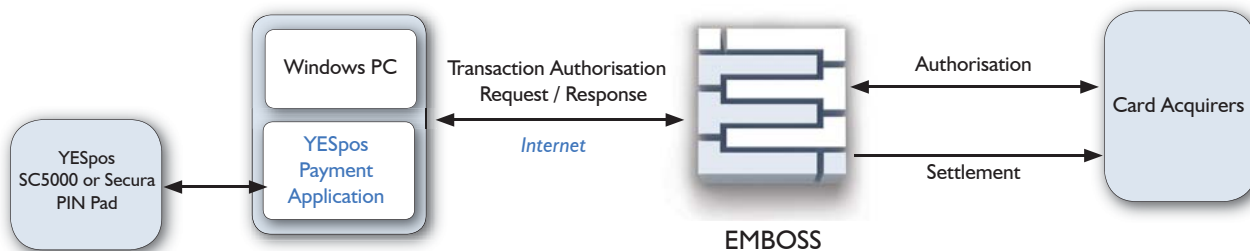

Combining simple, low-cost PIN Pads with YESpos
- the leading PC Payment Application

YESpos combines simple to use payment software with a choice of secure magnetic stripe and chip PIN Pad readers - the SC5000 and Secura. These compact card readers reduce countertop and cable clutter and are simple to use, with a backlit display and secure PIN Pad making them ideally suited for retailers and professional businesses to take card payments at the point of sale.

Verifone SC5000

Verifone Secura

End-to-end pre-accredited and PCI-DSS approved Bureau Service
